

1974 Triumph TR6 for sale.

The car has had a total nut and bolt rebuild. Engine and gearbox also completely rebuilt with new spares from UK.

The rebuild started as a track car but changed course to a road car midway through the process hence the track suspension is low and hard.

The four coil springs can be changed to standard at an economical price.

The car attained a gold medal at the 2022 Triumph National Concourse.

R385,000.
